ENVIRONMENTAL POLICY

It is the objective of J & P Contracts Management to comply with applicable environmental laws and to target for continual improvement by Management reviews of Environmental issues to ensure its suitability, effectiveness and performance in the prevention of pollution.

We at J & P Contracts are committed to establishing and maintaining an effective Environmental control, which provides a healthy and safe working environment, specifically committed to protecting the environment from damage through its activities, products and services.

Ensure that the environment is considered as part of our normal business planning activities, providing a framework for setting and reviewing environmental objectives and targets.

J & P Contracts provides a structured process for managing the company's environmental impacts and for making continued improvements. Ensuring that the company complies with legislation and that environmental concerns related to product design, manufacture, shipment and use are evaluated to minimise environmental impact. This commitment is communicated to all employees and any other persons connected to our activities.
